

EuRoC MAV: conformal OpenVINS versus popular stereo-inertial systems

**A. Overall accuracy ranking
(lower is better)**

**B. Per-sequence accuracy
(shaded columns are the held-out conformal test split)**

—●— ORB-SLAM3 SI [published]
 -▲- OKVIS2 VIO [published]
 -+— OpenVINS Stage-3 stock [local]
 -x— OpenVINS Stage-3 learned [local]

-■- OKVIS2 causal SLAM [published]
 -◆- OpenVINS stock, full sequence [local]
 -▼- VINS-Fusion SI [published]
 -★- OpenVINS Stage-3 conformalised [local]

Local OpenVINS runs use rigid SE(3) alignment. Published baselines come from ORB-SLAM3 Table II and OKVIS2 Table I and are not same-hardware reruns.
